

RAHUL K SURESH

Software Engineer

Kerala, India (Open to Relocation) | +91 7012421278 | rahulksuresh16@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Frontend Software Engineer with 2 years of professional experience building and maintaining the frontend of Aurex™, an enterprise Governance, Risk & Compliance (GRC) platform, using Angular and TypeScript. Experienced in developing end-to-end product features, integrating REST APIs, building reusable components, optimizing application performance, and collaborating with backend teams in an Agile environment. Currently expanding full-stack capabilities through hands-on projects and self-paced learning in Java, Data Structures & Algorithms, Node.js, Express.js, and PostgreSQL.

SKILLS

Frontend: Angular, TypeScript, JavaScript (ES6+), RxJS, NgRx, HTML5, CSS3/SCSS, Tailwind CSS, Bootstrap, Angular Material, Material UI, React, NextJS

Backend & APIs: Node.js, Express.js, RESTful APIs, REST API Integration, JWT Authentication, JSON, PostgreSQL, SQL, MongoDB

Languages: JavaScript, TypeScript, Java, C#, Python, C, C++

DevOps & Tooling: Git, GitLab, Jenkins CI/CD, VS Code, IntelliJ IDEA, GitHub Copilot

Architecture & Visualization: Webpack Module Federation, D3.js

Testing: Jasmine, Jest

Practices: OOP, SOLID Principles, Performance Optimization, Cross-Browser Compatibility, Accessibility, Agile/Scrum, Secure Coding

PROFESSIONAL EXPERIENCE

Beinex Consulting Pvt. Ltd. | Kochi, India

Software Developer (Jun 2024 – Dec 2024) | **Associate Software Developer** (Apr 2023 – Jun 2024) | **Frontend Developer Trainee** (Jan 2023 – Mar 2023)

Progressed from Frontend Developer Trainee to Software Developer, contributing to the development and enhancement of Aurex™, an enterprise Governance, Risk & Compliance (GRC) platform.

- Developed and maintained **Angular/TypeScript features across the Aurex™ product**, including dashboards, tables, forms, data visualization, and workflow-based modules.
- Migrated legacy tables to a reusable data-table solution with on-scroll data loading**, improving loading performance and user experience across the product.
- Developed **production dashboards and data visualizations**, using reusable components and standardized patterns to improve maintainability and accelerate feature development.
- Implemented **Arabic language support and product-wide localization**, enabling Aurex™ to support multilingual users.
- Integrated frontend features with **RESTful APIs**, collaborating closely with backend developers to deliver API-driven UI functionality and consistent data handling.
- Improved application performance through **lazy loading, code splitting, reusable components, and optimized data loading**.
- Implemented **Webpack Module Federation** for micro-frontend architecture, supporting modular development and independent team deployments.
- Worked with **GitLab and Jenkins CI/CD pipelines**, including Git workflows, pull requests, code reviews, automated builds, and deployments.
- Wrote unit tests using **Jasmine and Jest**, resolved production issues, and collaborated with QA and UX teams to improve reliability, accessibility, and cross-browser compatibility.
- Mentored junior developers** on Angular best practices and contributed to Agile/Scrum development and delivery.

Self-Directed Upskilling | Kerala, India

Backend & Full-Stack Development (Self-Paced) Jan 2025 – Present

- Building backend and full-stack proficiency through structured self-study in Java, Data Structures & Algorithms, and backend fundamentals, applied through independent full-stack projects (see Projects).

PROJECTS

E-Commerce Platform *(Self Project — Full-Stack)*

Angular, Node.js, Express.js, MongoDB

- Built a full-stack e-commerce platform with JWT authentication and RESTful APIs for product and order management.
- Developed a responsive Angular interface with reusable components, form validation, and cross-browser accessibility support.

Enterprise Employee Management System *(Self Project)*

Angular, TypeScript, NgRx, D3.js

- Developed a responsive employee management application with CRUD operations, reactive forms, reusable components, and NgRx state management.
- Integrated REST APIs and D3.js visualizations to present employee and organizational data.

B2B Industrial Resource Exchange Platform *(Academic Project)*

Angular, PHP, MongoDB, HTML, CSS

- Developed a B2B platform connecting small industries to buy, sell, and resell products and industrial by-products.
- Designed a resource-exchange model where by-products or waste from one business could become usable resources for another.
- Built responsive web interfaces using Angular, HTML, and CSS with MongoDB-backed application functionality.

EDUCATION

B.Tech in Information Technology Engineering

APJ Abdul Kalam Technological University — College of Engineering and Management, Punnapra | Jan 2022

CERTIFICATIONS

- Front-End Web Development — BEINEX
- JavaScript: The Complete Guide (Beginner + Advanced) — Udemy, Maximilian Schwarzmüller
- Programming using Java - Infosys Springboard.
- Ongoing: Java, Data Structures & Algorithms, and Backend Fundamentals (self-paced, 2025–present)
